ABOUT:

Bring the excitement with "Centrifugal Force"! This piece features plenty of articulation, exciting percussion, and a little chromaticism to bring some force to your program!

FROM THE COMPOSER:

"Centrifugal Force" - an apparent force that acts outward on a body moving and a center, arising from the body's inertia. This exciting piece features the use of accents, staccatos, chromatic progressions, and exciting percussion to bring the force on. Flowing woodwind melodies give this piece a little contrast between the forceful exciting sections, pushing it all the way to its exciting conclusion.

This piece will be a great to end your concert or an exciting festival selection.
